**DETAILED ACTION**

- 1) The following is a quotation of the second paragraph of 35 U.S.C. 112:  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, subparagraph (b) recites “interpreted seismic horizons of interest” (emphasis added). This language is ambiguous as to: (a) what or who performed the interpretation, and the nature of the interpretation, and; (b) of interest to whom, and the degree of interest. Therefore, the pending claims are indefinite, as the metes and bounds of the above cited claims can not be determined with a reasonable degree of certainty by one skilled in this art.

Applicant may cure this claim defect by removing the words “interpreted” and “of interest”.

2. Applicant is requested to provide with the reply to this action copies of all the relevant and material references and Office actions made of record in Applicant’s related U.S., PCT and foreign patent applications.
3. References A-I, N, O, U, and V (PTO-892) are cited to show Applicant’s related U.S. cases, and prior art systems for computing fracture gradients.
